

Supa Pro Wedgie Board is a high performance fully waterproof tile backer board made exclusively for Supa Pro by Marmox. The board provides a self draining fall of 1:52 over 1200mm. The Wedgie Board can be used to create falls in commercial showers, pool surrounds, balconies and domestic showers. With no wet trades a floor to falls can be laid and tiling commenced immediately. The consistent fall guarantees that no pooling will occur on the floor and the surface can be completely tanked to prevent water ingress into the substrate.

Falls can be extended to 2.4m and beyond by underlaying the Wedgie board with 20mm Marmox tile backer board. Suitable for tiling with ceramic or stone tiles from 50x50mm.

- * **Rapid time saving construction**
- * **Consistent fall of 1:52 for guaranteed no pooling**
- * **No drying out times, can be tiled immediately**
- * **Falls can be extended from 1200mm to 2400mm and beyond**
- * **Can be used to tank a floor by taping joints**

Ideal for domestic wet rooms with higher output showers, creation or refurbishment of commercial showers, swimming pool surrounds, balconies and other floors to be laid to falls.

Product size

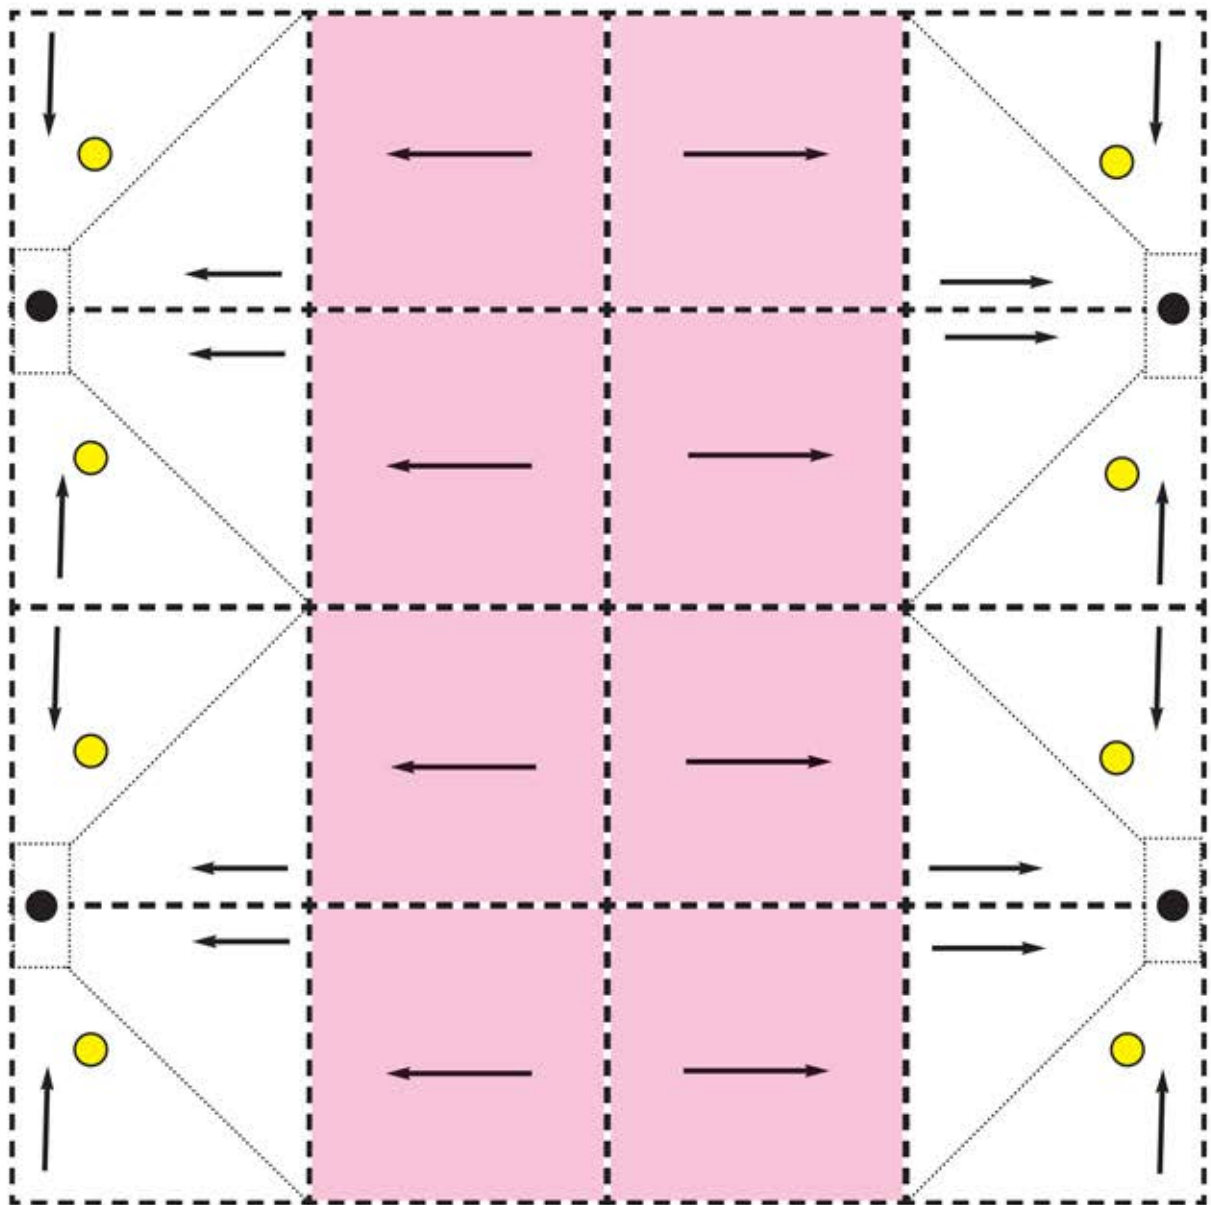

1200mm x 1200mm, falling from 33mm to 10mm thickness (1 in 52 fall)

Technical properties

Density 36Kg/m³ (DIN 53420)
 Thermal conductivity (5 years) 0.032 Watt/mK
 Water absorption capillary Nil (DIN53428)
 Coefficient of linear expansion 30 x 10⁻⁶

Thermal conductivity 0.027 Watt/mK (DIN 52612)
 Compressive strength 3.0Kg/cm² (300kN/m²) (DIN53421)
 Water absorption by immersion 0.02% by volume (DIN53428)
 Flammability B1 class '0' (DIN4102, BS476 part 6,7)

Sketch of possible layout for a sports centre shower complex using Marmox 'Wedgie' board 1200x1200mm, falling from 33mm to 10mm (1 in 52)

Key

- Schluter Kerdi drain, a detailed drawing would show that the drain is set into a 60x30cm flat and slightly recessed 10mm thick Marmox sheet. Alternatively a channel drain could be used which would avoid mitring.
- Shower head
- Direction of fall
- ⋯ Mitre joint
- Areas of Wedge board underlaid with 20mm Marmox sheet
