

Eterno Iveca Pedestal estimator

This provides an estimate for the required quantity of pedestals required for different size tiles. If the surface being installed has falls you will need varying pedestal heights. It is the customers responsibility to double check all estimates as liability will not be accepted for over or under ordering.

This estimator cannot provide details of pedestal heights.

For a more detailed estimate that includes pedestal heights please send plans and photographs which show heights to the underside of the 20mm porcelain across multiple points for your project.

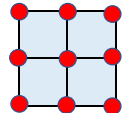

If the pedestal height is over 95mm or when it is in a commercial setting we recommend an additional central pedestal position.

Size of 20mm porcelain tile mm	Bond	Pedestal height under 10cm, residential			Pedestal height 10cm plus or light commercial		
		Placement	Smaller installs or installs with high proportion of cut tiles. No of pedestals per sq m	Larger installs with lower proportion of cut tiles. No of pedestals per sq m	Placement	Smaller installs or installs with high proportion of cut tiles. No of pedestals per sq m	Larger installs with lower proportion of cut tiles. No of pedestals per sq m
